Indian Council of Medical Research, New Delhi

Invites EoI from ICMR-INTENT Centres for
conducting Workshops at MRU/MRHRU's to
Expand Capacity for Conducting Clinical Trials

Invitation of Expression of Interest

The Indian Council of Medical Research (ICMR), New Delhi, invites Expression of Interest (EoI) from ICMR Indian Clinical Trial and Education Network (INTENT) centres for organising workshops on clinical trials for the Multi-Disciplinary Research Units (MRU) and Model Rural Health Research Unit (MRHRU) in order to expand capacity for designing and conducting the same. These workshops aim to provide comprehensive training and insights into the design, conduct, and management of clinical trials in alignment with global standards.

Interested applicants may submit required information through a Google form, the link for which is available at the end of this document by 20th April 2024. Please note that only shortlisted ICMR-INTENT centres will be contacted for the subsequent steps.

Background:

ICMR-INTENT is an initiative to build a network of research institutes which has been launched with an overarching goal of providing evidence based, robust and culturally sensitive solutions to urgent health problems, in a reasonable time frame, by conducting large multi-centric clinical trials. ICMR-INTENT aims to build an ecosystem of trained clinicians and researchers who are poised to take up clinical trials for providing end to end solutions for drugs, devices or interventions.

Clinical trial workshops are essential for fostering the knowledge and skills required to design, conduct, and manage clinical research effectively. These workshops play a crucial role in ensuring that clinical trials are conducted ethically, efficiently, and in compliance with regulatory requirements. Majority of young clinicians and researchers in the country are not aware of the systematic ways of designing and conducting a good quality clinical trial. Hence, there is a need to train them through workshops which would help in expanding the capacity to conduct clinical trials in the country.

In view of the above, ICMR proposes to support 25-30 high quality workshops to expand the capacity for conducting clinical trials in the MRU/ MRHRU's in different regions of the country during the year 2024-25. The list of existing MRU's and MRHRU's has been attached as annexure.

The workshops will be in regard to design, conduct, manage and analyse clinical trials and will be of three days. The workshop should include hands on sessions, so as to facilitate the participants to develop a proposal that could be further submitted to call for small/ intermediate grant to ICMR.

Role of INTENT sites:

The INTENT site is required to put together a team of experts from the institute who can take the sessions for this workshop. Each workshop will be attended by faculty and scientists of 4-5 MRU/MRHRU's. The key deliverable will be an extramural grant obtained on the basis of the protocol developed in the workshop.

Role of INTENT sites:

The INTENT site is required to put together a team of experts from the institute who can take the sessions for this workshop. Each workshop will be attended by faculty and scientists of 4-5 MRU/MRHRU's.

The logistics and organisation will be taken care by the organising MRU/MRHRU, and the workshops will be funded by the Indian Council of Medical Research
